| 2:15 pm. | Committee Reports   |
| 2:50 pm  | Wrap-up<br>Acknowledgements/Appreciation  |
| 3:00 pm  | Adjourn   |

# Opportunities and Obstacles Ahead

## Opportunities

By 2035 solar energy has the potential to power 40% of the nation's electricity and employ as many as 1.5 million people — without raising electricity costs for consumers. The U.S. can achieve 100% renewable energy by 2035.

*DOE Solar Future's Study (September 8, 2021)*

The Justice40 Initiative is a plan to deliver 40% of the overall benefits of climate investments to LMI disadvantaged communities and inform equitable research, development, and deployment of resources by the federal government.

## Obstacles

Black workers have the largest disparity between employment in clean energy and employment in the overall U.S. workforce among all racial and ethnic groups, with Black people composing 8 percent of the clean energy workforce (compared to 13 percent economy-wide). *Help Wanted:*

*Diversity in Clean Energy (September 9, 2021)*

## Questions for Committees

# BOSS Members:

# 2022 Strategy Session

1. Based upon the BOSS priorities, what are the 3 goals for the committee in 2022?
2. What 2 key performance indicators (KPIs) will demonstrate progress towards each goal?
3. When will the committee meet again?
4. What does this committee need to be successful in achieving its 2022 goals? From other committees, Board of Directors, etc.?
